HomeWorks® QS

Keypad Design & Style Ordering Guide

LUTRON®

HomeWorks® QS Keypads

- **flexible wall-mounted and tabletop designs** allow for customized button configurations that meet the individual needs of each homeowner

- **minimize wall clutter** by eliminating the need for several switches, while maximizing the number of possible functions

- **available in a variety of colors and metal finishes;** keypads can become design elements that blend in or provide a striking contrast

Table of Contents

Dynamic keypad

Dynamic keypads provide the functionality of multiple Lutron keypads in an easy-to-navigate intuitive arrangement.

- products are available in gloss black and white finishes

- rounded corners, squared edges

- uses custom mounting frame (included)

- for use with wired and wireless systems

Signature Series™ and Architrave™

Signature Series and Architrave styles offer a slim, elegant solution for wall-mounted keypads.

- available in several models

- square corners, beveled edges

- for use with wired systems

International

International seeTouch® offers flexible button configurations and more room for scenes and settings.

- products are available in many colors and finishes, including custom metals, glass, and color-matching

- two columns of buttons provide functional and cognitive organization in a compact design

- square corners, beveled edges

- uses international backbox (available for order)

- available in U.S. and international markets

- for use with wired systems

Architectural

Architectural products include GRAFIK Eye® controls, and seeTouch keypads that coordinate with Nova T★® wallplates and coordinating accessories.

- products are available in glass, Architectural matte, and metal finishes

- square corners, beveled edges

- for use with wired and wireless systems

Designer

Designer products include Maestro® local dimmers and switches, plus seeTouch keypads, which coordinate with Claro® and Satin Colors® wallplates and accessories.

- products are available in Designer gloss and Satin Colors (matte) finishes

- rounded corners, squared edges

- all products use standard designer-style opening

- for use with wired and wireless systems

RF Tabletop

The seeTouch tabletop keypad is the portable extension to a light control system, allowing the homeowner to keep it within his reach for the ultimate convenience.

- perfect for bedside and countertop locations

- available in 5-button, 10-button, or 15-button configurations

- multiple columns of buttons allow for functional and cognitive organization

- faceplates are available in snow (SW), midnight (MN) and metal finishes

- for use with wireless systems

Custom controls

Controls that perfectly match your design

Lutron controls have always been well known for their beautiful aesthetic, intuitive nature, and variety of standard choices. We understand that standard options do not always fit the bill. For projects that require specific design elements, or an exceptionally high degree of detail, we can help you create a unique control for each and every space:

• create exactly the right look for a space

• customize functionality to suit your client's needs

• enhance the interactive experience for occupants by providing unique, intuitive controls

What can be customized?

A faceplate created to fit over a third-party thermostat and a Lutron keypad.

Custom Faceplate

Faceplate Colors and Finishes

Button Engraving

Button Shapes   Button Colors   Faceplate Engraving

Option 1: Choose an existing custom design

Review options in the Custom Controls Design Guide (P/N 367-1753), then contact our customer service team for additional options. Consider customizing certain elements, such as color, finish, and engraving.

Option 2: Create a new custom design

Send us a sketch or mark-up of an image of an existing Lutron control, then contact our customer service team to start a conversation. We will work with you on the design parameters and feasibility.
Add personalized engraving to any control

As a finishing touch, you can add custom engraving. Text, icons, and images are all possible.

Icons and images

Our laser-engraving capabilities include the following icons in either dark gray or white text. These icons appear on engraving sheets as options for custom engraving.

Fonts and languages

The engraved font can be changed from the standard Helvetica to nearly any font, including characters from any language.

Engraving guidelines

For images and icons, files must be provided in .dxf or high-res .pdf format. In some cases, images and icons may need to be resized to fit appropriately on a button or faceplate.

For custom fonts, you can provide true-type font files or request a font by name.

Engraving available in dark gray or white text

Engraving options

Opposite page: The base of this custom tabletop version of an international-style keypad was fabricated to match a customer-supplied wood sample.
